Everything in one package

This analogue HD package contains everything you need for analogue wired video surveillance with recording in HD resolution. The 5-channel recorder including a 1 TB hard disk drive can record approx. 4 weeks of 24-hour video data from the 2 x 2 MPx mini tube cameras supplied. The system can be extended to max. 5 cameras if necessary.

Connect and record

# ABUS Analogue HD Video Surveillance 5-Channel Hybrid complete set

Art.-Nr. TVVR33025T

The set is directly preconfigured for use: mount the cameras, connect and then select the desired recording mode (when motion is detected, according to a schedule or continuous recording). The image data can be viewed live and in real time using an additionally connected monitor. The set is operated intuitively using the supplied USB mouse.

## Live display and recording in HD

The 5-channel hybrid recorder enables the recording and management of up to five cameras. Thanks to the hybrid function, up to four modern analogue HD cameras (HD-TVI standard) or affordable analogue cameras (including existing cameras). An ABUS IP camera can also be integrated via the router (Please refer to the compatible camera models in the specifications). The recorder is also Full HD-ready and can record and play back image data with 1080p resolution at 25 frames per second. This recorder is therefore perfect for upgrading existing analogue systems to HD or Full HD resolution.

## 24-hour surveillance

Thanks to automatic day/night switching, the cameras are suitable for 24-hour surveillance in outdoor areas. The IR LEDs provide increased security even in low lighting conditions. Due to their IP66 protection class, the cameras are also suitable for operation in outdoor areas.

The effective IR range will depend on the installation location.
