<b>Battery</b>	LiFePO4
<b>Warranty</b>	10 years

What is the purpose of a rechargeable flashlight if recharging takes a lifetime?. The rechargeable MAGLITE® ML150LR LED recharges from 0 to 80% within 30 minutes. Which is pretty fast! With 1082 lumens , an illumination range of 458 meters (which is almost five soccer fields) and a light ON time of up to 3 hours used in FULL-mode. In ECO-mode the MAGLITE® ML150LR LED convinces with 79 hours of continuous light ON time. All of that with just 439g of weight and a mid-size length of just 27 cm. In total five different light modes are available. The MAGLITE® ML150LR LED has been designed to be stored in the delivered charging-station which guarantees an always ready to use status, thanks to the inbuilt powerful and explosion-proof LiFePO4 battery. Looking at these specs and the typical MAGLITE-layout it is not a surprise that the National Tactical Officers Association assessed the MAGLITE® ML150LR LED with five stars in field tests, as well as being honored by the specialist journal „Security Today“ . Whenever law enforcement authorities, ambulance services or security companies are in need for a 100% reliable flashlight , the MAGLITE® ML150LR LED is their choice!
