Gain (max.)	dB	25*
Noise figure (typ.)	dB	3
Consumption (max.) (5 ... 12V=)	mA=	40
Protection index		IP 20
Dimensions	mm	215 x 102 x 105
Weight	grs	350

KEY FEATURES

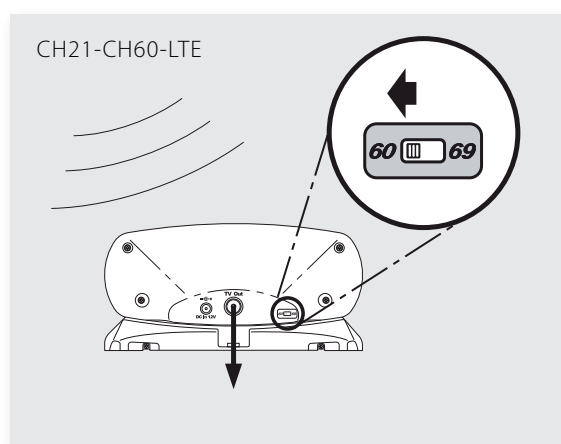

- ✓ Incorporates the revolutionary electronic **device BOSS Tech**, which automatically controls its gain for the incoming TV signal. This domestic antenna ensures the best possible signal quality on your television, even in fringe areas. Thanks to its electronic circuitry, it also **reduces to the minimum possible, those interferences** caused by movements near the antenna and the TV.
- ✓ The antenna INNOVA BOSS **does not need orientation**. Place the antenna in horizontal or vertical position in the desired location and connect it. This is the first domestic PLUG&PLAY antenna in the market.
- ✓ In addition, the domestic INNOVA BOSS antenna features all those necessary filters to make it compatible with the emerging Digital Dividend, ie, the deployment of 4G network broadband services for mobile. **That is why the INNOVA BOSS antenna is identified with the mark LTE.**
