TOWER MOD. 180

REF. 3048/3038/3029/3021/3037/3031/3032

A TAILOR-MADE TOWER

Televes launches the renovated Tower Mod. 180, based on a new concept of design and manufacturing, which results in a considerable improvement in its torsional rigidity.

All the effort in engineering provides the installer a bigger ease of handling and assembly, as well as a greater resistance of the tower at different heights, thanks to the new distribution of its lattice.

- Change of the lattice's structure which increases strength and torsional stiffness.
- New detachable record that allows a better protection of the section against rusting, thus increasing the durability of the tower.
- Made of steel with shiny zinc and bi-chrome coating and RPR.
- **New fitting system that facilitates the insertion between sections.**
- **New metric of fine pitch.**

REF	DESCRIPTION	WEIGHT	EAN 13
3048	Pivoting base embedded	3 kg	8424450136546
3038	Frame base embedded	2,4 kg	8424450136492
3029	Base bracketry	1,5 kg	8424450135921
3021	ICT top end (0,6m)	2 kg	8424450136324
3037	Lower section (3m)	12,8 kg	8424450136553
3031	Middle section (3m)	11,2 kg	8424450136560
3032	Upper section (3m)	11,4 kg	8424450136577
