

# Xenon Flashing Light (red)

Art. no. SG1670

Page 1 of 1

- Including adapter and surface mounting
- High flash power
- Can also be mounted on SG1660
- Splashproof
- Protection class: IP54

You can install the Xenon flashing light inside and outside your building. The optical signalling device is a crucial link in a fully functioning alarm chain. At the start of the chain is a detector. In the event of an alarm, the colored Xenon flashing light can be seen over a large distance and flashes at 70 times a minute. The robust plastic housing (IP 54) of the signalling device offers protection against the environmental influences. The flashing light is supplied externally with 12V operating voltage. You can choose between three different light colors, according to your requirements: red (SG1670), yellow (SG1675) and blue (SG1680).

## Technical Data:

Dimensions	(WxHxD) 175x110x75 mm
Flashing frequency	1.17 Hz
Width	175 mm
Housing material	ABS
Height	110 mm
Length	75 mm
Power consumption	4,2
Luminous color	Red
Illuminant	Xenon

Max. operating temperature	55 °C
Min. operating temperature	-25 °C
Installation location	Indoors and protected outdoor areas
Net weight	0.15 kg
IP protection class	54
DC voltage supply	12 V
Power consumption	350 mA
